

Embark

Preparing Children for Kindergarten and Beyond

Embark is an age-appropriate early learning program that combines **engaging interactive online lessons** with **hands-on learning activities**, and high-quality children’s literature. The program is designed for children aged 3–5 for use in an in-school classroom or at-home setting. Schools across the nation are using Embark:

- As curriculum in **transitional kindergarten** classrooms
- To provide **language arts** and **math lessons** to students who are not prepared for kindergarten
- To provide preschool-level content to students with specific **IEP goals**

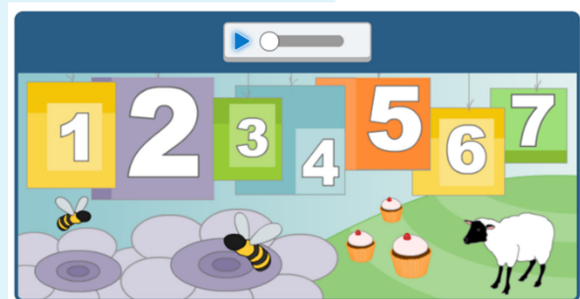

Stride Learning Solutions recently enhanced and relaunched this award-winning program to create a streamlined, **flash-free experience** within the Online School (OLS) platform.

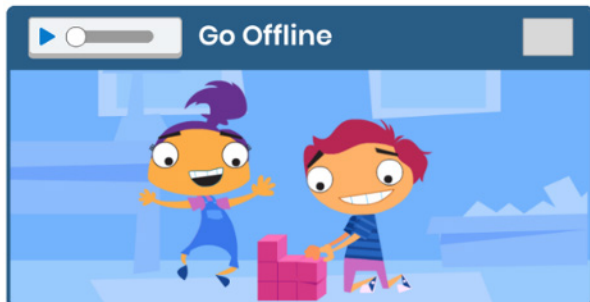

Courses have **delightful characters** and **larger images** on the pages for the younger students.

Animation and voice support student engagement.

Multiple **online activities** provide independent practice for the student.

Student online activities have audio and no text to **encourage independence**.

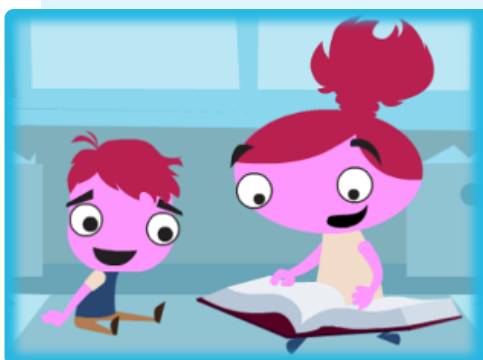

A voice tells the student to **practice offline**.

Offline activities creatively use **child-appropriate manipulatives** and **items commonly found in a school or home**, such as crayons, pencils, paper, tape, and glue.

Lesson guides provide **objectives, activity guidelines, and teaching tips** for each unit. Links to **lesson guides** are on the offline activity pages and the lesson intro page to **make it easy for the onsite teacher, Learning Coach, or caring adult** to find the related guide. Suggested **English Language Learner (ELL)** strategies are included in most activities.

Lessons end with a quiz where the onsite teacher, Learning Coach, or caring adult enters **observational information** indicating the **student's proficiency** in the lesson objectives.

Assessment checklists help the onsite teacher, Learning Coach, or caring adult **monitor the student's progress** to inform the need to **reinforce or extend concepts**.

The curriculum features **18 thematic units** that are relevant to young children, such as **Family and Friends, My Five Senses, and Looking at Animals**. Units can be used in full or in part to complement a program already in use.

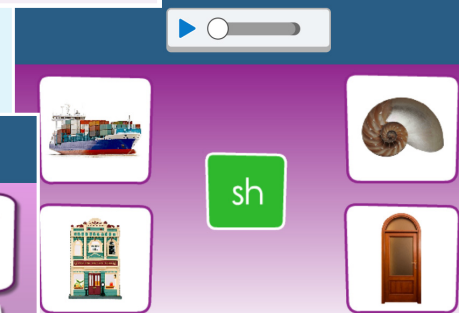

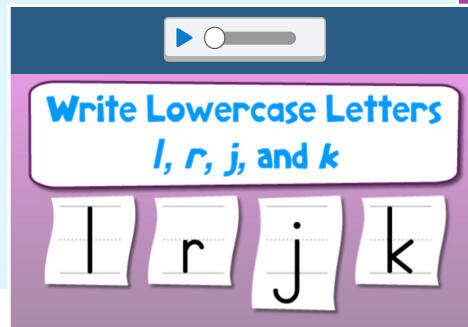

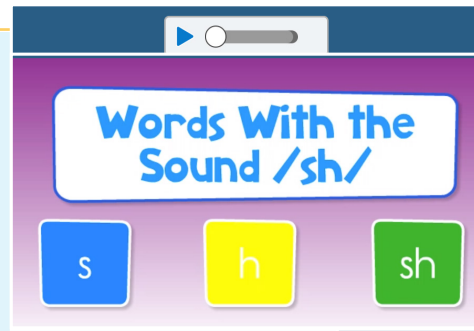

Six subjects are covered in each thematic unit. Each subject has **4–6 modules** that include **online and offline activities** for each thematic unit.

The Embark program has **430+ modules** and more than **1,200 activities**.

Language Arts

Embark Language Arts help children:

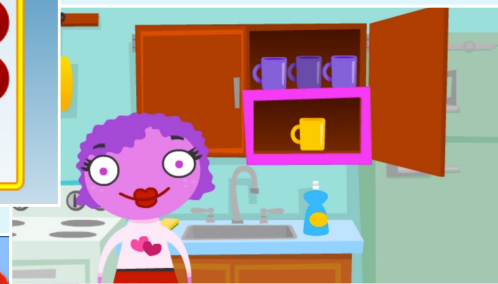

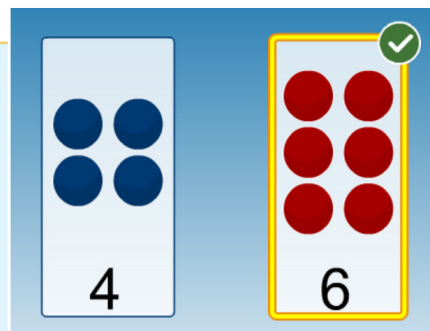

- Discriminate the sounds of the English language
- Blend sounds to **make words**
- Say, read, and **write the letters** of the English alphabet
